

Timberoll 100

Bottom Rolling Sliding Systems

Timberoll 100 is a bottom-rolling sliding system specifically designed for lighter interior and exterior timber or metal doors.

Capable of supporting door panels up to 100kg, this cutting-edge hardware system is perfect for sliding patio doors featuring timber-framed glazed panels. Any number of panels can be effortlessly configured on single or multiple lines of rail, allowing them to slide seamlessly to one or both sides of the opening.

Equipped with interlocks, anodised aluminium track and guide channels, the system guarantees stability and security when closed, whilst providing exceptional weather resistance, insulation, and an effortlessly smooth operation.
