Brio stands for high-quality, sliding and folding door hardware which is expertly designed, assembled and tested. Our products breathe light into buildings by bringing the outdoors in, opening up spaces and creating hideaways.

We have a passion for turning design ideas into functional solutions, whether connecting living spaces with beautiful vistas or providing flexible work areas for classrooms and offices.

As part of the Allegion family of brands, Brio has local expertise backed by global resources which is why Brio is a leader in door hardware solutions and the trusted choice time after time.

Weatherfold

Recognised as the architectural standard in exterior folding door hardware, Weatherfold is a high quality, reliable top hung door hardware system designed to handle panels up to 100kg with precision and ease. Suitable for both timber and aluminium panels, Weatherfold can accommodate folding solutions for both windows and doors in residential and commercial environments.

Interfold

Specifically designed for residential and commercial applications, Interfold is a top hung, end folding system suitable for doors of equal width up to 50kg, which can be used with or without a floor channel.

With 2 systems available and up to 4 colour options, the Interfold hardware system is ideal for partitioning off rooms and will complement any style of light weight interior door.

Single Run

Single Run is a top hung system designed for interior and exterior sliding shutters and doors up to 350kg and is ideally suited for use in residential, commercial and light industrial applications. This quiet and dependable hardware system operates smoothly and effortlessly, due to its nylon bodied hangers complete with nylon tyred wheels and precision bearings all housed in an anodised aluminium track.

Options include soft close (up to 100kg), bi-parting or bi-passing layouts, standard or low headroom hanger types and a range of bottom guidance alternatives to suit all requirements.

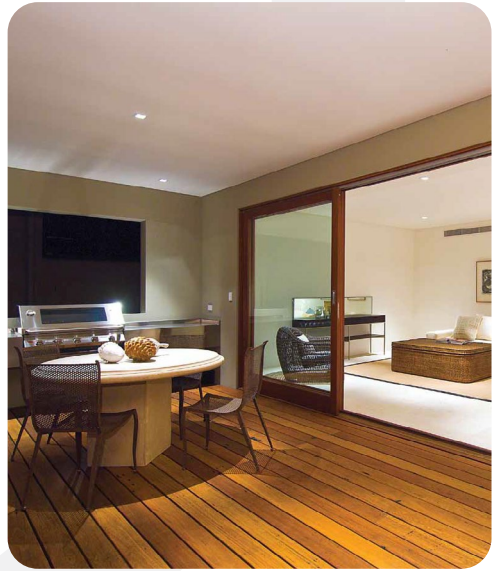

Timberoll

Timberoll is an internal and external bottom roller sliding window and door hardware system for panel weights up to 200 kilograms.

Ideally suited for large sliding windows or patio sliding doors with timber framed glazed panels, the system can be used in both residential and commercial applications where any number of panels can be used on single and multiple lines of rail that can slide to one or both sides of the opening.

Interlocks and anodised aluminium track and guide channels ensure doors remain stable and secure when closed, offer weather resistance and insulation, and provide a smoother operation.
